Fire danger today is **MODERATE**. After a couple of days of drying, the mix of sun and clouds, warm temps, moderate Rh and light winds has allowed fire danger to creep up. Fire danger is higher where the mix of live fuels is less significant and where winds are somewhat stronger. Open burning is allowed where fuels and winds are favorable.

Tomorrow's weather is expected to be similar to today except for a slight chance of scattered showers. Fire danger will remain MODERATE.

[Six Minutes for Safety: An interagency safety initiative that address high-risk situations that historically get firefighters in trouble.](#)

Report Submitted by: Tess Greaves, VT Dept. of Forests, Parks & Recreation
